Introduction

Product Description

The IB965F PICMG 1.3 SHB Express full size CPU Card is based on the latest Intel® BD82B75 chipset. The platform supports 3rd Generation Intel® Core i7/i5/i3 with LGA1155 packing and features an integrated dual-channel DDR3 memory controller as well as a graphics core (4000).

Display interfaces of the CPU card include VGA CRT, DVI-D and *24-bit dual channel LVDS*. The edge connectors are for VGA CRT, USB 2.0, USB 3.0 and dual Gigabit LAN RJ45 connectors. One SATA III port and three SATA II ports are available. Expansion slot is provided with a Mini PCIe socket on the component side. Four serial ports and a parallel port are supported.

Dimensions of the board are 338mm x 126mm.

IB965F FEATURES:

- Supports Intel® 3rd Generation Core i7/i5/i3 DT processors
- Two DDR3 DIMM, 1066/1333/1600MHz, Max. 16GB
- Dual Intel® PCI-Express Gigabit LAN
- Integrated Graphics for CRT, DVI-D, LVDS displays
- 3x SATA 2.0, 1x SATA III, 3x USB 2.0, 3x USB 3.0
4x COM, 1x parallel port
- Mini PCIe socket, iSMART, Watchdog timer, Digital I/O
- 2x SATA 2.0, 4x USB 2.0 for PICMG 1.3 backplane
- 1x PCI-E (x16), 1x PCI-E (x4), 4x PCI for PICMG 1.3 backplane

Checklist

Your IB965F package should include the items listed below.

- The IB965F PICMG 1.3 SHB Express Full-Size CPU Card
- This User's Manual
- 1 CD containing chipset drivers and flash memory utility

IB965F Specifications

Product Name	IB965F (B75) IB965RF(Q77)
Form Factor	PICMG 1.3 SHB Express Full size CPU card
CPU Type	- 3 rd Generation Intel® Core™ i7/i5/i3 DT processor - FCLGA1155 package [37.5 mm x 37.5mm] - TDP: QC= 77W/65W ; DC=45W/35W
CPU Speed	2.3GHz ~ 3.4GHz (TDP=35W~77W)
BIOS	AMI BIOS, support ACPI Function
CPU Socket	LGA1155
Chipset	Intel® BD82B75 PCH [IB965F] Intel® BD82Q77 PCH [IB965RF] 27mm x 27mm, FCBGA942 (TDP=6.7W)
Memory	3 rd Generation Intel® Core™ i7/i5/i3 DT processor integrated memory controller, support DDR3-1333/1600 MHz (Non-ECC) - DIMM x 2, Max. 16GB
VGA / LVDS	3 rd Generation Intel® Core™ i7/i5/i3 DT processor integrated graphics device - VGA - LVDS (Chrontel CH7511 via DP, support 24-bit dual channel) - DVI-D: via level-shifter ASM1442
LAN	1. Intel® 82579V GbE PHY x1 2. Intel® 82583V PCI-e Gigabit LAN controller x1 ** There is no LAN signal to the backplane**
USB	Intel® BD82B75/Q77 PCH integrated USB 2.0 host controller - 2 ports thru onboard pin-header - 1 port @ rear panel I/O - 1 port via MiniPCle @ component side Intel® BD82B75/Q77 PCH integrated USB 3.0 host controller - 1 port @ rear panel I/O 2 ports via onboard box header [2*10 pins box header, Blue color] 6 ports on SHB, 4 ports to the backplane [Connector C]
Serial ATA Ports	Intel® BD82B75/Q77 PCH built-in SATA controller, supports total 6 ports 1 x SATAIII + 3 x SATAII (one SATA II shared with mSATA)[IB965F] 2 x SATAIII + 2 x SATAII (one SATA II shared with mSATA)[IB965RF] [2 x SATA 2.0 ports to the backplane Connector C]
Audio	Intel® BD82B75/Q77 PCH built-in high definition audio w/ Realtek ALC662 Codec support 5.1 channel
LPC I/O	Fintek F81866AD-1 (128-pin LQFP [14mm x 14 mm]) - COM1 (RS232/422/485), jumper-less design (SP339) - COM2/COM3/COM4 (RS232), - Hardware monitoring (2 thermal inputs, 4 voltage monitor inputs & 2 Fan headers, one PWM fan type = 4-pin for CPU FAN; one DC fan type = 3-pin for SYS FAN) - Support Parallel port
Digital IO	4 in & 4 out
Keyboard/Mouse Connector	Supports PS/2 Keyboard/Mouse thru onboard pin-header
Expansion Slots	Mini PCIe socket x1@ component side [Full-sized] Support USB client & mSATA[share with onboard SATA]

Edge Connector (The same as IB970)	DB15 x1 for VGA RJ45 x 2 for LAN 1 & 2 USB 2.0 x 1 USB 3.0 x 1
Onboard Header/Connector	DF11-20 pins pin-header x1 for DVI-D DF13-20 pins pin-header x 2 for 24-bit dual channel LVDS(** brightness control not supported**) 2x13 pins box-header x1 for Printer port DF11-20 pins box-header x1 for COM1/2 DF11-20 pins box-header x1 for COM3/4 2x5 pins pin-header x1 for USB 2.0 x2 2x6 pins pin-header x1 for Audio (Line-Out, Line-In & Mic) 2 x 5 pins pin-header x 1 for Digital I/O 2 x 4 pins pin-header x 1 for PS/2 KB/MS 4 pins pin-header x1 for CPU fan (PWM smart fan) 3 pins pin-header x1 for system fan SATA x 4 (Black connectors for SATA2; Blue connectors for SATA 3) 2X10 pins pin-header x 1 for front panel indicators 2 x 2 pin ATX power connector x 1
Interface	1x PCIe(16x) [Connector A & B] 4x PCIe(1x) or 1x PCIe(4x) [Connector A] 4x PCI masters [Connector D]
Watchdog Timer	Yes (256 segments, 0, 1, 2...255 sec/min)
Others	- RAID function (0, 1, 5, 10) [IB965RF only] - iSMART{Thru MCU for supporting auto scheduler & Power resume} - LAN wake up - TPM 1.2 supported - Reserved extra mounting hole as IB970
System Voltage	+5V, +3.3V, +12V, -12V & 5VSB
RoHS	Yes
Board Size	338mm x 126mm

Board Dimensions

Installations

This section provides information on how to use the jumpers and connectors on the IB965F in order to set up a workable system. The topics covered are:

Installing the CPU.....	7
Installing the Memory.....	8
Setting the Jumpers.....	9
Connectors on IB965F.....	14

Installing the CPU

The IB965F board supports an LGA1155 Socket (shown below) for Intel Sandy Bridge processors.

To install the CPU, unlock first the socket by pressing the lever sideways, then lift it up to a 90-degree. Then, position the CPU above the socket such that the CPU corner aligns with the gold triangle matching the socket corner with a small triangle. Carefully insert the CPU into the socket and push down the lever to secure the CPU. Then, install the heat sink and fan.

NOTE: *Ensure that the CPU heat sink and the CPU top surface are in total contact to avoid CPU overheating problem that would cause your system to hang or be unstable.*

Installing the Memory

The IB965F board supports two DDR3 memory socket for a maximum total memory of 16GB in DDR3 DIMM memory type.

Installing and Removing Memory Modules

To install the DDR3 modules, locate the memory slot on the board and perform the following steps:

1. Hold the DDR3 module so that the key of the DDR3 module aligned with that on the memory slot.
2. Gently push the DDR3 module in an upright position until the clips of the slot close to hold the DDR3 module in place when the DDR3 module touches the bottom of the slot.
3. To remove the DDR3 module, press the clips with both hands.

Setting the Jumpers

Jumpers are used on IB965F to select various settings and features according to your needs and applications. Contact your supplier if you have doubts about the best configuration for your needs. The following lists the connectors on IB965F and their respective functions.

JP1: COM1 RS232 RI/+5V/+12V Power Setting.....	10

BIOS Setup

This chapter describes the different settings available in the AMI BIOS that comes with the board. The topics covered in this chapter are as follows:

BIOS Introduction.....	26
BIOS Setup.....	26
Advanced Settings	28
Chipset Settings.....	40
Boot Settings	47
CSM Parameters	48
Security Settings.....	49
Save & Exit Settings.....	50

BIOS Introduction

The BIOS (Basic Input/Output System) installed in your computer system's ROM supports Intel processors. The BIOS provides critical low-level support for a standard device such as disk drives, serial ports and parallel ports. It also provides password protection as well as special support for detailed fine-tuning of the chipset controlling the entire system.

BIOS Setup

The BIOS provides a Setup utility program for specifying the system configurations and settings. The BIOS ROM of the system stores the Setup utility. When you turn on the computer, the BIOS is immediately activated. Pressing the key immediately allows you to enter the Setup utility. If you are a little bit late pressing the key, POST (Power On Self Test) will continue with its test routines, thus preventing you from invoking the Setup. If you still wish to enter Setup, restart the system by pressing the "Reset" button or simultaneously pressing the <Ctrl>, <Alt> and <Delete> keys. You can also restart by turning the system Off and back On again. The following message will appear on the screen:

Press to Enter Setup

In general, you press the arrow keys to highlight items, <Enter> to select, the <PgUp> and <PgDn> keys to change entries, <F1> for help and <Esc> to quit.

When you enter the Setup utility, the Main Menu screen will appear on the screen. The Main Menu allows you to select from various setup functions and exit choices.

Warning: *It is strongly recommended that you avoid making any changes to the chipset defaults. These defaults have been carefully chosen by both AMI and your system manufacturer to provide the absolute maximum performance and reliability. Changing the defaults could cause the system to become unstable and crash in some cases.*

▶ PCI Express Settings					

Above 4G Decoding

Enables or Disables 64bit capable devices to be decoded in above 4G address space (only if system supports 64 bit PCI decoding).

PCI Latency Timer

Value to be programmed into PCI Latency Timer Register.

VGA Palette Snoop

Enables or disables VGA Palette Registers Snooping.

PERR# Generation

Enables or disables PCI device to generate PERR#.

SERR# Generation

Enables or disables PCI device to generate SERR#.

PCI Express Settings

Change PCI Express devices settings.

PCI Express Settings

Aptio Setup Utility					
Main	Advanced	Chipset	Boot	Security	Save & Exit

	ASPM Support		Disabled		
	WARNING: Enabling ASPM may cause some PCI-E devices to fail				
	Extended Synch		Disabled		
	Link Training Retry		5		
	Link Training Timeout (uS)		100		
	Unpopulated Links		Keep Link ON		
				→ ← Select Screen ↑ ↓ Select Item Enter: Select +- Change Field F1: General Help F2: Previous Values F3: Optimized Default F4: Save ESC: Exit	

Relaxed Ordering

Enables or disables PCI Express Device Relaxed Ordering.

Extended Tag

If ENABLED allows device to use 8-bit Tag field as a requester.

No Snoop

Enables or disables PCI Express Device No Snoop option.

Maximum Payload

Set Maximum Payload of PCI Express Device or allow System BIOS to select the value.

Maximum Read Request

Set Maximum Read Request Size of PCI Express Device or allow System BIOS to select the value.

ASPM Support

Set the ASPM Level: Force L0s – Force all links to L0s State:

AUTO – BIOS auto configure : DISABLE – Disables ASPM.

Extended Synch

If ENABLED allows generation of Extended Synchronization patterns.

Link Training Retry

Defines number of Retry Attempts software will take to retrain the link if previous training attempt was unsuccessful.

Link Training Timeout (uS)

Defines number of Microseconds software will wait before polling 'Link Training' bit in Link Status register. Value range from 10 to 1000 uS.

Unpopulated Links

In order to save power, software will disable unpopulated PCI Express links, if this option set to 'Disable Link'.

ACPI Settings

Aptio Setup Utility

Apno Setup Utility

Intel SMX Technology			Supported		
64-bit			Supported		
Hyper-threading			Enabled		
Active Processor Cores			All		
Limit CPUID Maximum			Disabled		
Execute Disable Bit			Enabled		
Intel Virtualization Technology			Disabled		
Adjacent Cache Line Prefetch			Enabled		

Hyper-threading

Enabled for Windows XP and Linux (OS optimized for Hyper-Threading Technology) and Disabled for other OS (OS not optimized for Hyper-Threading Technology). When Disabled, only one thread per enabled core is enabled.

Active Processor Cores

Number of cores to enable in each processor package.

Limit CPUID Maximum

Disabled for Windows XP.

Execute Disable Bit

XD can prevent certain classes of malicious buffer overflow attacks when combined with a supporting OS (Windows Server 2003 SP1, Windows XP SP2, SuSE Linux 9.2, Red Hat Enterprise 3 Update 3.)

Intel Virtualization Technology

When enabled, a VMM can utilize the additional hardware capabilities provided by Vanderpool Technology.

Adjacent Cache Line Prefetch

To turn on/off prefetching of adjacent cache lines.

SATA Configuration

SATA Devices Configuration.

USB Devices:					
2 Hubs					
Legacy USB Support		Enabled			
USB3.0 Support		Enabled			
XHCI Hand-off		Enabled			
EHCI Hand-off		Enabled			
Port 60/64 Emulation		Disabled			
USB hardware delays and time-outs:					
USB Transfer time-out		20 sec			
Device reset time-out		20 sec			
Device power-up delay		Auto			

Legacy USB Support

Enables Legacy USB support.

AUTO option disables legacy support if no USB devices are connected.

DISABLE option will keep USB devices available only for EFI applications.

USB3.0 Support

Enable/Disable USB3.0 (XHCI) Controller support.

XHCI Hand-off

This is a workaround for OSes without XHCI hand-off support. The XHCI ownership change should be claimed by XHCI driver.

EHCI Hand-off

Enabled/Disabled. This is a workaround for OSes without EHCI hand-off support. The EHCI ownership change should be claimed by EHCI driver.

Port 64/60 Emulation

Enables I/O port 60h/64h emulation support. This should be enabled for the complete USB keyboard legacy support for non-USB aware OSes.

USB Transfer time-out

The time-out value for Control, Bulk, and Interrupt transfers.

Device reset time-out

USB mass Storage device start Unit command time-out.

Device power-up delay

Maximum time the device will take before it properly reports itself to the Host Controller. 'Auto' uses default value: for a Root port it is 100ms, for a Hub port the delay is taken from Hub descriptor.

Setup Prompt Timeout

Number of seconds to wait for setup activation key.

65535(0xFFFF) means indefinite waiting.

Bootup NumLock State

Select the keyboard NumLock state.

Quiet Boot

Enables/Disables Quiet Boot option.

Fast Boot

Enables/Disables boot with initialization of a minimal set of devices required to launch active boot option. Has no effect for BBS boot options.

GateA20 Active

UPON REQUEST – GA20 can be disabled using BIOS services.

ALWAYS – do not allow disabling GA20; this option is useful when any RT code is executed above 1MB.

Option ROM Messages

Set display mode for Option ROM. Options are Force BIOS and Keep Current.

INT19 Trap Response

Enable: Allows Option ROMs to trap Int 19.

Boot Option Priorities

Sets the system boot order.

CSM Parameters

This section allows you to configure the boot settings.

Aptio Setup Utility					
Main	Advanced	Chipset	Boot	Security	Save & Exit
Launch CSM			Always		
Boot option filter			UEFI and Legacy		
Launch PXE OpROM policy			Do not launch		
Launch Storage OpROM policy			Legacy only		
Launch Video OpROM policy			Legacy only		
Other PCI device ROM priority			Legacy OpROM	→ ← Select Screen ↑ ↓ Select Item Enter: Select +- Change Field F1: General Help F2: Previous Values F3: Optimized Default F4: Save ESC: Exit	

Boot option filter

This option controls what devices system can boot to.

Launch PXE OpROM policy

Controls the execution of UEFI and Legacy PXE OpROM.

Launch Storage OpROM policy

Controls the execution of UEFI and Legacy Storage OpROM.

Launch Video OpROM policy

Controls the execution of UEFI and Legacy Video OpROM.

Other PCI device ROM priority

For PCI devices other than Network, Mass storage or Video defines which OpROM to launch.

This section allows you to configure and improve your system and allows you to set up some system features according to your preference.

Restore/Load Defaults values for all the setup options.

Save as User Defaults

Save the changes done so far as User Defaults.

Restore User Defaults

Restore the User Defaults to all the setup options.

Drivers Installation

This section describes the installation procedures for software and drivers. The software and drivers are included with the motherboard. If you find the items missing, please contact the vendor where you made the purchase. The contents of this section include the following:

Intel Chipset Software Installation Utility	52
VGA Drivers Installation	55
Realtek HD Audio Driver Installation	58
LAN Drivers Installation.....	60
Intel® Management Engine Interface	64
Intel® USB 3.0 Drivers	67

IMPORTANT NOTE:

After installing your Windows operating system, you must install first the Intel Chipset Software Installation Utility before proceeding with the drivers installation.

Intel Chipset Software Installation Utility

The Intel Chipset Drivers should be installed first before the software drivers to enable Plug & Play INF support for Intel chipset components. Follow the instructions below to complete the installation.

1. Insert the CD that comes with the board. Click **Intel** and then **Intel(R) 7 Series Chipset Drivers**.

2. Click **Intel(R) Chipset Software Installation Utility**.

3. When the Welcome screen to the Intel® Chipset Device Software appears, click **Next** to continue.

4. Click **Yes** to accept the software license agreement and proceed with the installation process.

5. On the Readme File Information screen, click **Next** to continue the installation.

6. The Setup process is now complete. Click **Finish** to restart the computer and for changes to take effect.

VGA Drivers Installation

NOTE: Before installing the *Intel(R) Core™ i3/i5/i7 Graphics Driver*, the Microsoft .NET Framework 3.5 SPI should be first installed.

To install the VGA drivers, follow the steps below.

1. Insert the CD that comes with the board. Click *Intel* and then *Intel(R) 7 Series Chipset Drivers*.

2. Click *Intel(R) Core™ i3/i5/i7 Graphics Driver*.

3. When the Welcome screen appears, click *Next* to continue.

4. Click *Yes* to agree with the license agreement and continue the installation.

5. On the Readme File Information screen, click *Next* to continue the installation of the Intel® Graphics Media Accelerator Driver.

6. On Setup Progress screen, click *Next* to continue.

7. Setup complete. Click *Finish* to restart the computer and for changes to take effect.

Realtek HD Audio Driver Installation

Follow the steps below to install the Realtek HD Audio Drivers.

1. Insert the CD that comes with the board. Click **Intel** and then **Intel(R) 7 Series Chipset Drivers**.

2. Click **Realtek High Definition Audio Driver**.

3. On the Welcome to the InstallShield Wizard screen, click *Next* to proceed with and complete the installation process.

4. The InstallShield Wizard Complete. Click *Finish* to restart the computer and for changes to take effect.

LAN Drivers Installation

1. Insert the CD that comes with the board. Click **Intel** and then **Intel(R) 7 Series Chipset Drivers**.

2. Click **Intel(R) PRO LAN Network Driver**.

3. Click **Install Drivers and Software**.

4. When the Welcome screen appears, click **Next**.

5. Click **Next** to to agree with the license agreement.

6. Click the checkbox for **Drivers** in the Setup Options screen to select it and click **Next** to continue.

7. The wizard is ready to begin installation. Click **Install** to begin the installation.

8. When InstallShield Wizard is complete, click **Finish**.

Intel® Management Engine Interface

The following application requires Microsoft .NET Framework 3.5 or later: Intel® Management Engine Components. Please install the latest version of Microsoft .NET Framework from Microsoft Download Center to run this application correctly.

Follow the steps below to install the Intel Management Engine.

1. Insert the CD that comes with the board. Click *Intel* and then *Intel(R) iAMT 8.0 Drivers*.

2. When the Welcome screen to the InstallShield Wizard for Intel® Management Engine Components, click the checkbox for **Install Intel® Control Center** & click **Next**.

3. Click **Yes** to agree with the license agreement.

4. When the Setup Progress screen appears, click **Next**. Then, click **Finish** when the setup progress has been successfully installed.

Intel® USB 3.0 Drivers

1. Insert the CD that comes with the board. Click *Intel* and then *Intel(R) 7 Series Chipset Drivers*.

2. Click *Intel(R) USB 3.0 Drivers*.

3. When the Welcome screen to the InstallShield Wizard for Intel® USB 3.0 eXtensible Host Controller Driver, click **Next**.

4. Click **Yes** to agree with the license agreement and continue the installation.

5. On the Readme File Information screen, click **Next** to continue the installation of the Intel® USB 3.0 eXtensible Host Controller Driver.

6. Setup complete. Click **Finish** to restart the computer and for changes to take effect.

This page is intentionally left blank.

Appendix

A. I/O Port Address Map

Each peripheral device in the system is assigned a set of I/O port addresses which also becomes the identity of the device. The following table lists the I/O port addresses used.

Address	Device Description
0000h - 001Fh	DMA Controller #1
0020h - 003Fh	Interrupt Controller #1
0040h - 0043h	Timer
0050h - 0053h	Timer
0060h	Keyboard Controller
0064h	Keyboard Controller
0070h - 0077h	Real Time Clock
00A0h - 00BFh	Interrupt Controller #2
00C0h - 00DFh	DMA Controller #2
02E8h - 02EFh	Serial Port #4(COM4)
02F8h - 02FFh	Serial Port #2(COM2)
0378h - 037Fh	Parallel Port #1(LPT1)
03E8h - 03EFFh	Serial Port #3(COM3)
03F8h - 03FFh	Serial Port #1(COM1)
E000h - E01Fh	82583V Gigabit Network
F000h - F03Fh	Graphics adapter Controller
F060h - F07Fh	82579V Gigabit Network

B. Interrupt Request Lines (IRQ)

Peripheral devices use interrupt request lines to notify CPU for the service required. The following table shows the IRQ used by the devices on board.

Level	Function
IRQ0	System Timer Output
IRQ1	PS/2 Keyboard
IRQ3	Serial Port #2
IRQ4	Serial Port #1
IRQ7	Serial Port #3
IRQ8	Real Time Clock
IRQ11	Serial Port #4
IRQ12	PS/2 Mouse
IRQ18	82583V Gigabit Network
IRQ20	82579V Gigabit Network

C. Watchdog Timer Configuration

The WDT is used to generate a variety of output signals after a user programmable count. The WDT is suitable for use in the prevention of system lock-up, such as when software becomes trapped in a deadlock. Under these sorts of circumstances, the timer will count to zero and the selected outputs will be driven. Under normal circumstance, the user will restart the WDT at regular intervals before the timer counts to zero.
